

Archive Report

Last fall I finished sorting all the archive pictures I had scanned. After 3 years of scanning and sorting I finished. It was a job well done. For Christ Lutheran's 60th anniversary, George (Fosselius) made a slide show that was shown during the luncheon. I posted pictures on our sliding dividers and people were able to see slides of our former members since the church was built. I thought after I had done 60 years of archive pictures my job was done. Then I found some more pictures in the crawl space under the chancel. So the goal now in 2009 was to look for duplicates and compile them and start scanning and notating the pictures. It will take time, as it is a slow process. I tried to work one day a week for 1 or 2 hours to accomplish this.

As I said, I was going to continue with the archive project. But as of 2010 I have personal obligations and will not have the time. So hopefully George will have time to train a new person. I am really glad that I had the time to work on that project. I will thank George for what he has taught me as we were able to show pictures to the congregation. I wish we had more time and could show them more often.

Respectfully submitted
